

Gas Compression Systems, Inc.

1035 Entry Drive • Bensenville, IL • 60106

Our Facility

Gas Compression Systems, Inc. operates a 23,000 square foot manufacturing facility in Bensenville, Illinois just 15 minutes from Chicago O'Hare airport. The facility houses the engineering, manufacturing, assembly, test, quality control, shipping/receiving and back office in a single location.

The facility has more than adequate electric power and floor space to allow for continued growth. The in-house automated machining capabilities have reduced manufacturing lead times for both existing products and prototype development. The location is ideal for cost-effective and timely air and ground shipments.

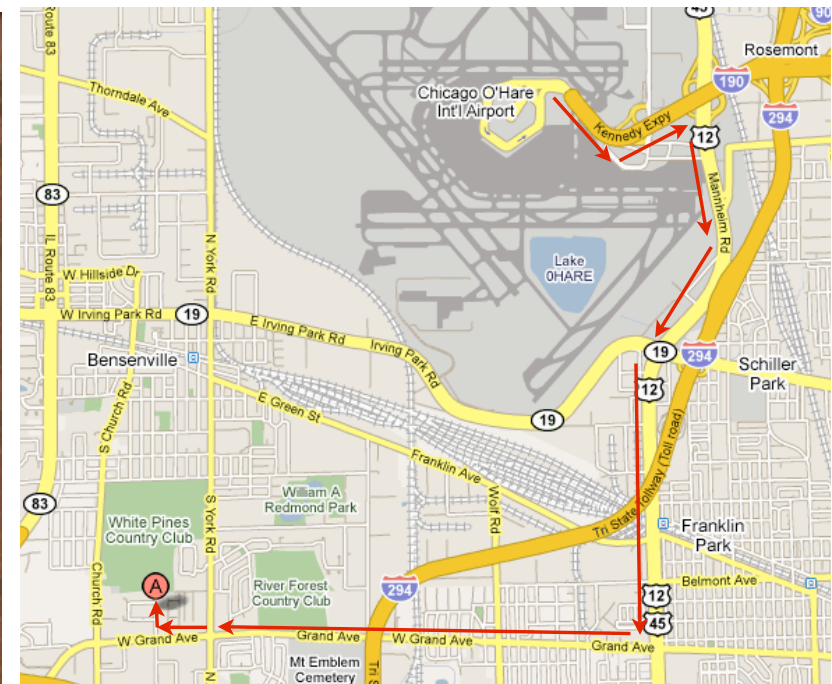

We have the resources and personnel to meet your needs.

High Pressure Testing Center

Mazak Integrex 200S

Automated Machining Centers

GCS Facility

- 210 square meters of office space
- 40 square meter quality control room
- 900 square meter assembly floor
- 900 square meter machine shop with enclosed office and quality control room
- air conditioning throughout building
- 800 amperes of 460V power
- 600 amperes of 240V power
- 2 recessed truck docks
- 2 overhead doors
- 55 hp of compressed air with refrigerated dryer and membrane dryer
- 1 Mazak Integrex IV-200 multitasking machining center
- 3 Mazak Integrex IV-200S multitasking machining centers
- 4 CNC vertical machining centers
- 2 CNC lathes
- 4 Bridgeport Turret Mills
- 6 manual lathes
- 2 honing machines
- 1 cylinder grinder
- 3 surface grinders
- 1 tool grinder
- 2 band saws
- 1 programmable saw
- 1 coordinate measuring machine
- 2 forklifts, 2 die lifts
- 2 gantry cranes
- 1 sand blaster
